DETAILED ACTION

1. The Art Unit location of your application in the USPTO has changed. To aid in correlating any papers for this application, all further correspondence regarding this application should be directed to Art Unit 2617.

Response to Arguments

1. Applicant's arguments with respect to claims 21-24 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. **Claims 21-24 are rejected under 35 U.S.C. 103(a) as being unpatentable over (US 6697352; hereinafter Ludwig) in view of Turunen (US 6477644).**

Regarding claim 21, Ludwig discloses in a cellular network system (Fig. 6: GSM), an interface unit comprising a first interface functionally connected with at least one management element of the cellular network (Fig. 6), a second interface functionally connected to the public internet and adapted to provide access to one or more cellular network services for entities which are connected to the Internet and are authorized by

the cellular network system (using authentication protocol is known for authorizing subscribers to their services: Col 6, line 46-50; Fig. 6; Col 2, line 61 – Col 3, line 1-35).

To further be clear on the limitation of a second interface functionally connected to the public internet and adapted to provide access to one or more cellular network services for entities which are connected to the Internet and are authorized by the cellular network system (Abstract; Fig. 2, 3; Col 6, lines 28-40).

It would have been obvious to one ordinarily skilled in the art at the time of invention to incorporate Turunen's disclosure to provide security for services.

Regarding claim 22, Ludwig discloses the interface according to claim 21, wherein said management unit is a base station controller (BSC: Fig. 6).

Regarding claim 23, Ludwig discloses the interface according to claim 21, wherein said management unit is a mobile switching service center (MSC: Fig. 6)

Regarding claim 24, Ludwig discloses the interface according to claim 21, wherein said management unit is a high level control (Fig. 7: HDLC; Col 3, lines 53-60).

Conclusion

3. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
